

HeronIOS

Its “2 click to start, 2 minutes to scan, 2 seconds to check” method helps the practitioner start their day quickly and focus more on the patient.

HeronIOS and 3DiscClinic provide the perfect entry into digital dentistry.

Its “2 click to start, 2 minutes to scan, 2 seconds to check” method helps the practitioner start their day quickly and focus more on the patient.

HeronIOS

Simply scan is key for a smooth transition to digital dentistry.

"Simply Scan is key for a smooth transition to digital dentistry."

The Key benefits...

01

Ergonomic Design

Heron IOS' ergonomical design offers significant benefits to dental practitioners, enhancing both efficiency and comfort during patient examinations.

02

Lightest Scanner on the market

The exceptional lightness of this HeronIOS, weighing a mere 150 grams, revolutionizes the dental imaging experience with unparalleled ease of use and maneuverability.

03

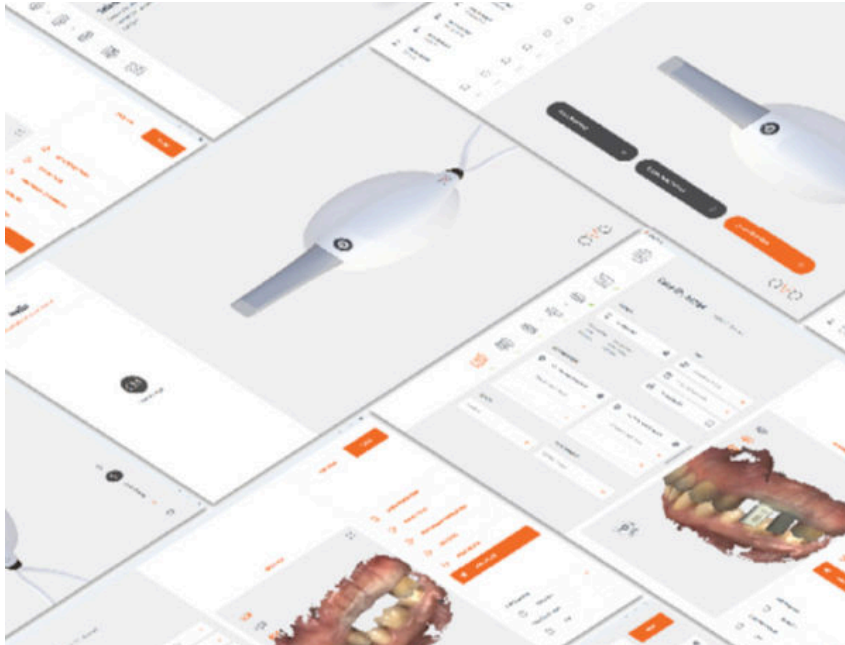

360 Degree Rotatable Tip

The 360 degree rotatable tip enables seamless navigation around the oral cavity, ensuring enhanced accessibility to all areas.

04

250 times autoclavable tips

With its 250-times autoclavable tips, 3DISC shows the quality of the material used in our scanner.

3DiscClinic

With a comprehensive set of digital tools and the integration of Fly AI, 3DISC guides the dentist through an optimal impression-taking process, reassuring the dentist in everyday use and guaranteeing patient comfort and precision restorations, from simple restorations to the most severe cases.

- Single click smooth communication between clinics and laboratories
- Flexible export options in multiple formats such as STL, OBJ, PLY
- Fully integrated open CAD/CAM systems (DWOS, exocad, etc.)
- Possibility to export locally or through our dedicated 3DiscCloud platform
