

PLANMECA

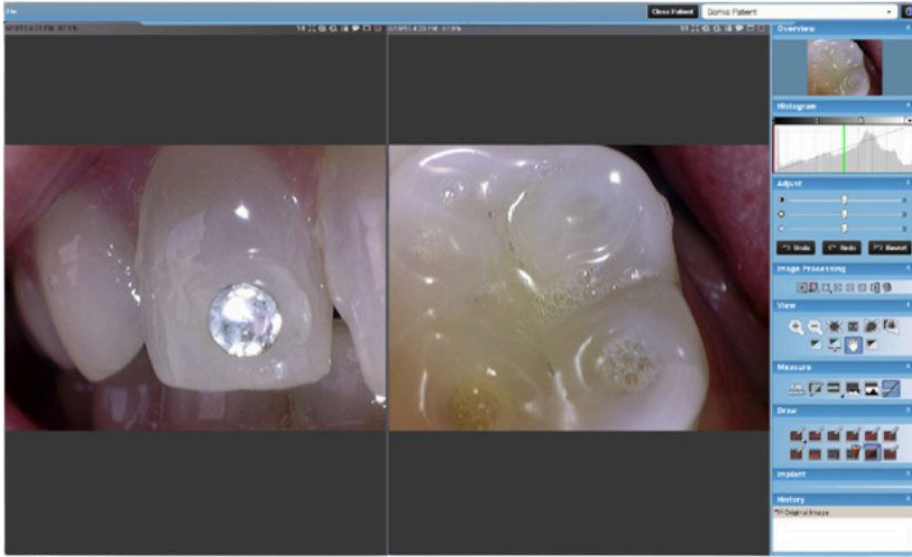

Planmeca announces new intraoral camera

Planmeca is presenting a new intraoral camera. **Planmeca Somia™** is a light and slender intraoral camera that facilitates patient communication and image documentation. Because of its small size and user-friendly operation, it is a valuable aid for all dental professionals.

In today's demanding environment image quality, pixel density and ease of use are paramount. The Somia intraoral camera provides this and so much more, including integrating with the award-winning Planmeca Romexis software. This adds to the communication experience with your patient and in some cases becomes a useful adjunct when developing a treatment plan for your patient's wellbeing.

- High quality image
- User-friendly operation
- USB Connectivity
- Stand alone or integrated with Planmeca Treatment Units
- 24 month warranty when delivered together with a treatment unit, 12 month warranty from date of installation when purchased as stand alone.
