

Cloud Design

You scan. We plan.

The best design software is one you don't have to learn how to use. SprintRay Cloud Design allows you to tackle production in your office with a blend of artificial intelligence and experienced on-demand designers, all managed from a single cloud portal. SprintRay Cloud Design integrates RayWare for print setup, where appliances can be batched or sent to any cloud-connected SprintRay 3D printer. Choose between AI Designs (crowns as of now, more to come later) and a wide range of treatments handled by our expert designers.

Sprintray AI

Scan, design, print, and place
in as little as 60 minutes

Design Single-Visit with SprintRay AI

Scan, design, print, and place in as little as 60 minutes

Harness the power of artificial intelligence to streamline your digital workflow. Using proprietary algorithms, our AI system designs dental appliances in minutes, no human intervention required. Send to your 3D printer and place same-day for a wow factor your patients won't soon forget.

- Only available for posterior teeth
- Only one tooth per case selectable
- If Prep Line is not detectable and a manual design chosen, consider it to be done within additional 24h turnaround time

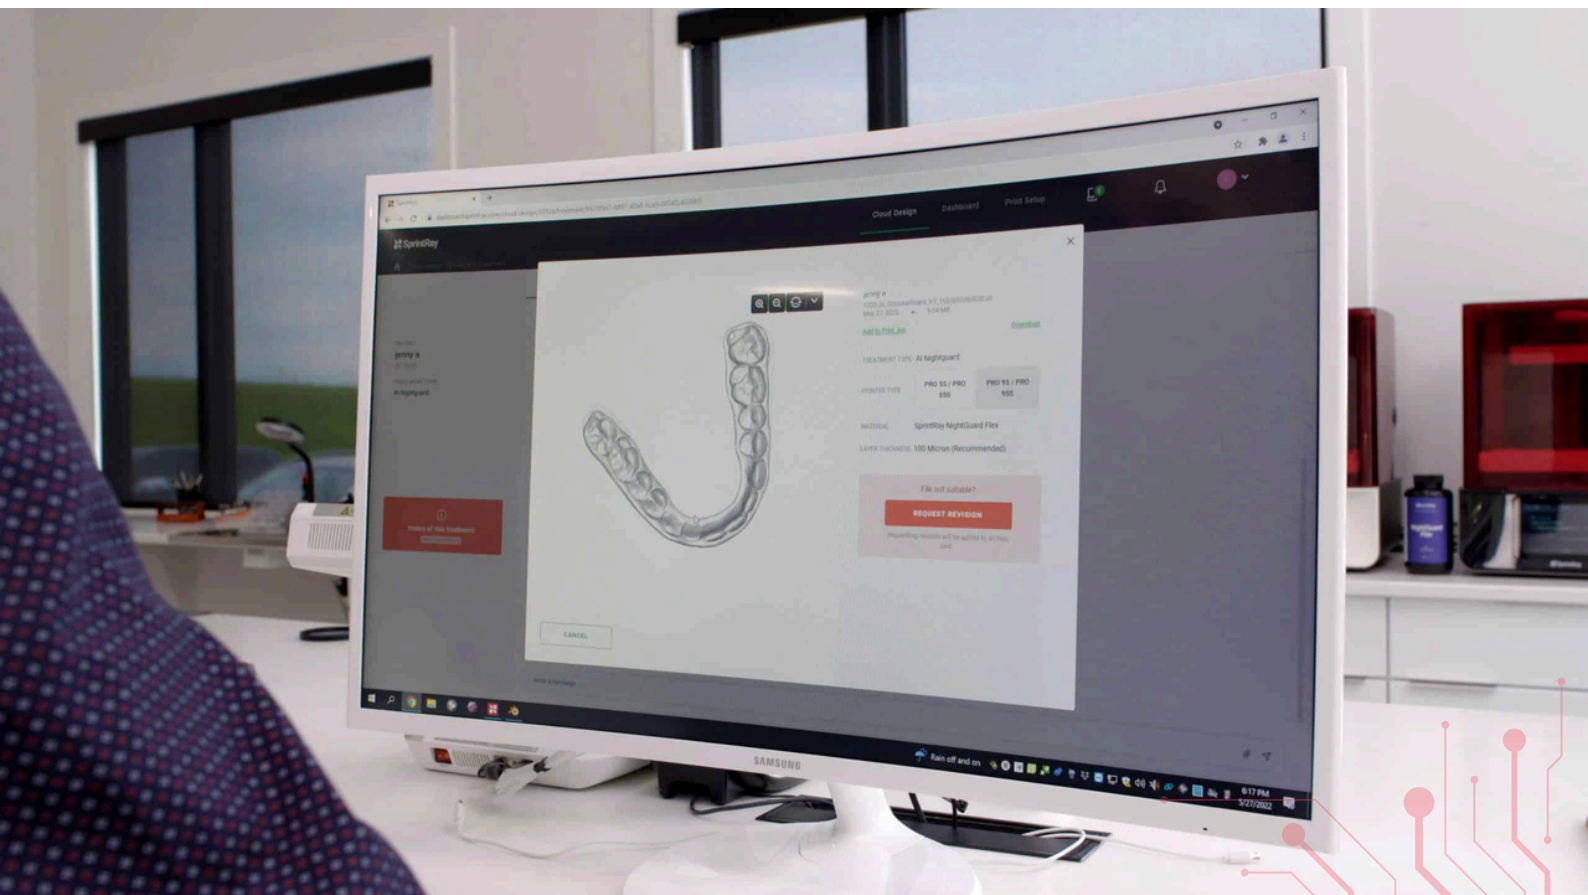

Signature Design

Choose treatment, upload data, 3D print

Signature Design

Choose treatment, upload data, 3D print

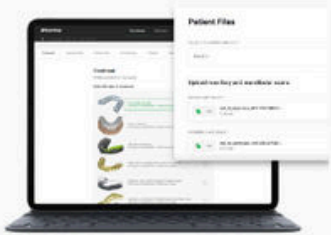

SprintRay Signature Design is the perfect solution for a busy dental clinic. Sign in to SprintRay Cloud, upload patient data, and request a treatment. Our expert design team will collaborate with you to rapidly create a custom appliance. Send designs via the cloud to your 3D printer to fabricate in-office.

Simple Design Steps, Fast

Taking the work out of in-house production

Submit

Choose treatment type, upload patient data, and provide supporting details.

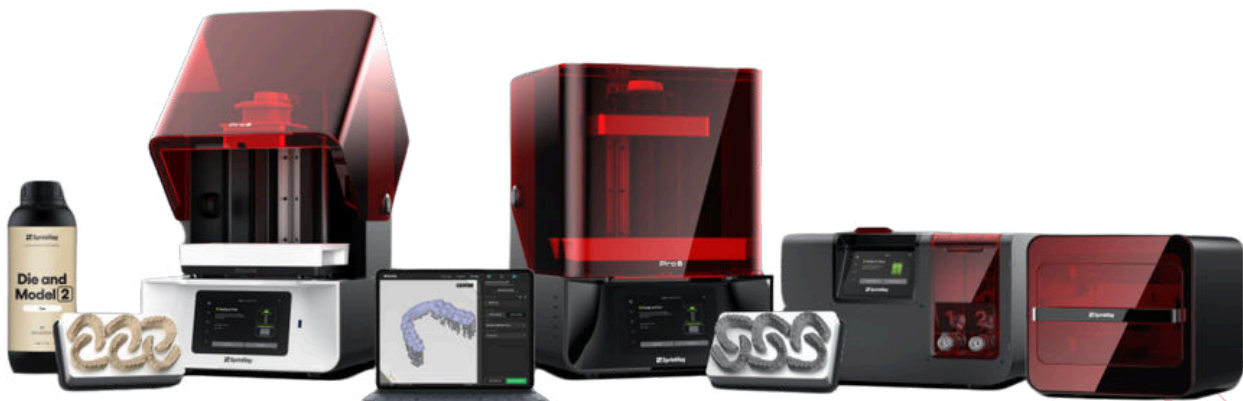

Accept

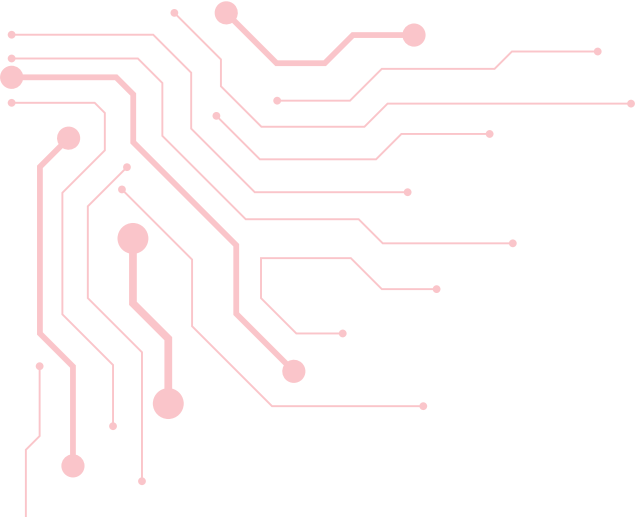

Evaluate a preview of your design and the treatment plan. Request revisions if desired.

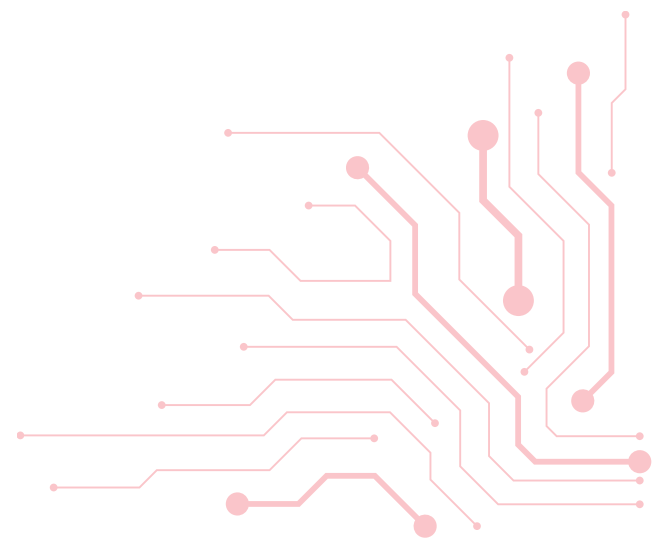

3D Print

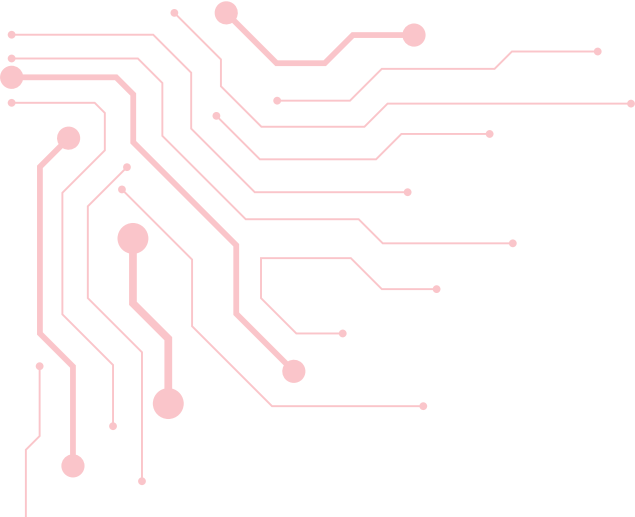

Send file directly to your SprintRay 3D printer for fast in-office fabrication.
