

PLANMECA

Planmeca Compact™ i Classic

Dentistry's modern classic

Planmeca Compact™ i Classic is the modern classic of our dental unit range – a functional choice that combines the best benefits of our ergonomic and practical design solutions.

Easy to learn, easy to use

Planmeca Compact™ i Classic has been designed for a smooth workflow and superior ease of use. Just like all our dental units, it is equipped with a simple and intuitive touch panel that guides you in your preferred language and lets you adjust all essential unit, instrument and infection control functions. The dental unit and instruments can also be operated directly from the foot control, leaving your hands free for patient treatment.

PLANMECA

Ergonomic instrument use

Planmeca Compact i Classic can be equipped with the same comprehensive instrument range as all our dental units. The balanced instrument arms guarantee an ergonomic workflow, since only small movements are needed to use the instruments. The unit can also be equipped with hanging tube instruments. The interchangeable instruments and easy console movements allow the unit to be swiftly tailored to meet personal preferences.

A relaxing treatment experience for the patient

Planmeca Compact i Classic always supports a relaxing treatment experience – even through longer visits. The chair design follows the shape of the patient's body and provides firm support, while the double-articulated headrest allows comfortable positioning of the patient's head. Armrests can be fitted for additional support. The Ultra Relax™ upholstery, made of durable artificial leather and viscoelastic memory foam, guarantees extra comfort.

PLANMECA

Durable and practical design

We use aluminium parts and an epoxy paint finish in our dental units for ultimate durability. The seamless, powder-coated surfaces and automatic flushing and cleaning programs meet the strictest infection control requirements. The side-lifting chair and small cuspidor base provide maximised legroom for both the dentist and assistant, with the lean and narrow backrest design further ensuring excellent access to the treatment area.

Instant access to personal settings on any dental unit

The one-of-a-kind Planmeca PlanID™ sign-in system allows dentists to access their personal settings instantly on any dental unit with a simple flash of a card. This helps clinics utilise their equipment flexibly, since dental units no longer need to be assigned to specific users.

PLANMECA

Stand out with colour

Our dental unit upholsteries come in an extensive selection of vibrant colours. There is something for everyone – allowing you to find the exact tone to perfectly complement the rest of your clinic.
